

FOR IMMEDIATE RELEASE

COSATRON CONTINUES DISTRIBUTION EXPANSION IN NORTHEAST FLORIDA

Concord, NC (*September 9, 2014*) – CosaTron, the leading U.S. manufacturer of air contamination control systems for commercial HVAC systems, announced the addition of Tom Barrow Company to its expanding representative network. CosaTron’s air purification technology is availability immediately to the northeast region of Florida.

“We are pleased to announce the partnership with Tom Barrow and are confident in their ability to represent the CosaTron brand and its premier technology,” said Doug Crooks, Director of Sales at CosaTron.

The new relationship with Tom Barrow represents a stronger presence in this area moving forward. Tom Barrow will represent the full line of CosaTron Air Purification Systems. CosaTron products are designed to remove contaminants in both existing buildings and new construction. Ideal applications include airports, medical facilities, government agencies, schools, retail spaces, convention centers, and other industrial and commercial buildings.

“We welcome the addition of the CosaTron product line to our product portfolio,” said Keith Billings, Vice President and Jacksonville Branch Manager, “IAQ continues to be a growing segment of the HVAC market, and CosaTron is a well-known and proven leader in the field.”

Positive Customer Impact

Clients around the globe specify and benefit from CosaTron's Air Purification Systems. Employing local representation to train and support customers is imperative for growth and increased brand awareness for the company. Established in 1955, Tom Barrow Co. is one of the HVAC industry's leading manufacturing representative firms. The rock-solid foundation of each company will lead to a significant positive impact in air purification of buildings in Northeast Florida.

About CosaTron

CosaTron is the global leader in indoor air quality solutions with over 33,000 installations in 18 countries. For over 50 years, CosaTron's patented technology has been controlling submicron contaminants in commercial, industrial and institutional applications such as medical facilities and government buildings without any negative side effects, such as ozone and "contaminate plating". CosaTron technology accelerates the natural process of collision and coagulation improving the efficiency of filters, which allows the efficient removal of germs, bacteria, allergens, smoke, volatile organic compounds, industrial process byproducts and other dangerous pollutants from the air. CosaTron is a division of CRS Industries, Inc. and is a privately owned U.S. company.
