

FOR IMMEDIATE RELEASE

COSATRON SIGNS REPS IN OR, MT, WY & FL

Concord, NC (September 21, 2015) – CosaTron, the leading U.S. manufacturer of air contamination control systems for commercial, industrial and residential HVAC projects, announces the addition of three new manufacturer representatives to its expanding rep network. CosaTron’s air purification technology is available immediately to the construction communities in Portland, Montana, Northern Wyoming, and Central Florida.

Validated Custom Solutions (VCS) has office locations in both Tampa and Orlando. When asked of the partnership, CosaTron’s Director of Sales Doug Crooks said “Since Central Florida has been our home base for much of our history, it is very important for CosaTron to be aligned with one of the most dynamic and progressive rep firms in the industry. We have accomplished just that with our partnership with Validated Custom Solutions.” VCS Managing Partner Dan Fillenwarth expressed similar accolades, “We are pleased to add CosaTron’s unique technology to our product offering as it represents not only the best in class, but is also the perfect fit with our other lines.”

Norman S. Wright’s northwest division has signed on to represent CosaTron’s technology from its Portland, Oregon office. “Our esteemed sales and application engineers focus on customers’ needs and industry changes. This includes building codes, energy-efficient technology, human health and safety, and capital and operational costs. CosaTron’s technology is a demonstration of our focus. We are looking forward to offering CosaTron to our design and construction professionals,” said Vice President Stefan Lidington at Norman S. Wright Northwest Mechanical Equipment.

In addition to VCS and Norman S. Wright, the air purification company has also signed Vemco, Inc. The firm has served the Montana, South Dakota, and Northern Wyoming as a manufacturer’s representative specializing in innovative and energy-efficient HVAC systems for over 38 years. “The Vemco team is knowledgeable and experienced. We are excited to introduce CosaTron to this territory,” said CosaTron’s West Coast Sales Manager Henry Wiggin.

About CosaTron

CosaTron is the global leader in indoor air quality solutions with over 33,000 installations in 18 countries. For over 50 years, CosaTron's patented technology has been controlling submicron contaminants in commercial, industrial and institutional applications such as medical facilities and government buildings without any negative side effects, such as ozone and "contaminate plating". CosaTron technology accelerates the natural process of collision and coagulation improving the efficiency of filters, which allows the efficient removal of germs, bacteria, allergens, smoke, volatile organic compounds, industrial process byproducts and other dangerous pollutants from the air. CosaTron is a division of CRS Industries, Inc. and is a privately owned U.S. company.
