

FOR IMMEDIATE RELEASE

COSATRON SIGNS IDAHO AND WESTERN CANADIAN REPS

Concord, NC (*November 13, 2014*) – CosaTron, the leading U.S. manufacturer of air contamination control systems for commercial and residential HVAC systems, announces the addition of Mechanical Products of Idaho, LLC and Exel Systems, Inc. to its expanding representative network. CosaTron’s air purification technology is available immediately to customers in Idaho and provinces in Western Canada.

Brent Robertson of Mechanical Products of Idaho is “excited for the opportunity“. As concern for indoor air quality intensifies, CosaTron’s name keeps making the news. West Coast Sales Manager Henry Wiggin has vetted and signed several strong manufacturers’ reps this season. “We are pleased to announce the partnership with MP of Idaho and are confident in their ability to represent the CosaTron brand and our leading technology,” said Wiggin.

Established in 1993, Exel Systems, Inc. specializes in engineering design and supply of the highest quality custom heating, ventilation and air conditioning products. Their focus is on servicing the institutional, commercial and industrial marketplaces. Exel Systems has two Canadian office locations (Edmonton and Calgary). The firm will cover Alberta, Northwest Territories, Yukon Territory, and Nunavut Canadian Provinces. President for Exel, Jeff Elkow, was quoted as saying "I would like to say that our timing for representation of CosaTron is perfect, as we have a large project that we are currently working on with a need for CosaTron

technology. That said, we are looking forward at other possible CosaTron applications within our territory. Thank you for the opportunity."

About CosaTron

CosaTron is the global leader in indoor air quality solutions with over 33,000 installations in 18 countries. For over 50 years, CosaTron's patented technology has been controlling submicron contaminants in commercial, industrial and institutional applications such as medical facilities and government buildings without any negative side effects, such as ozone and "contaminate plating". CosaTron technology accelerates the natural process of collision and coagulation improving the efficiency of filters, which allows the efficient removal of germs, bacteria, allergens, smoke, volatile organic compounds, industrial process byproducts and other dangerous pollutants from the air. CosaTron is a division of CRS Industries, Inc. and is a privately owned U.S. company.
