

Improve Environmental Air Quality & Control Odors

- ☀ **Low Operational Costs** ☀
- ☀ **Control Mold & Odors** ☀
- ☀ **Reduce Fear of Cross Pollination** ☀
- ☀ **More Effective than Carbon Filtration** ☀
- ☀ **No Required Annual Parts Replacement** ☀
- ☀ **No Ozone** ☀

Ask us about standard HVAC filters verses expensive gas phase and carbon filters.

☀ **over 33,000 installations worldwide** ☀

Because Clean Air Matters

CosaTron Air Purification Systems will control contaminants at the source by acting as a filter enhancement device, it is not a collection device.

Controlling some of the common pollutants found in offices, schools and public buildings will help improve the indoor air quality and reduce the risk of health concerns related to indoor air quality (IAQ).

All types of buildings need a solution for poor indoor air quality, including grow facilities for marijuana. Many buildings have poor IAQ because of internal air pollution sources such as common VOCs or they have inefficient or poorly designed ventilation systems. CosaTron units make every building healthier.

Our Products

CosaTron Air Purifiers are the result of decades of continuous research and development. Our **patented technology** is proven to improve air handling and filtration efficiency without creating ozone or ionizing the air. There is a custom solution for every application.

Proven Performance Matters

- Using the same patented technology since 1958
- Does not create ozone or ionize the air
- Reduces energy costs
- Improves health
- Lowers cleaning and maintenance costs
- 5-year warranty on all products
- Removes pollen and mold
- Reduces odors and deposition
- Reduces airborne pathogens
